

WHAT TO EXPECT

GRAMMAR LEVEL | LOWER ELEMENTARY (4K-3RD)

NEW GRAMMAR

Utilizing Claritas Publishing's four cycles of the *Memory Work Guide*, students commit to memory hundreds of facts in the following subjects:

- Timeline of World History
- History sentences
- Geography (map identification)
- Science
- Math
- English Grammar
- Latin
- Scripture
- Hymns

All facts are set to music. Students learn and practice the catchy jingles while moving around the classroom--dancing, marching, jumping-jacking, crab-crawling, and more! Classes also spend 30 minutes a week playing review games that cover the previous 6 weeks of Memory Work.

Additionally, in this class students deliver a 2-3 minute presentation each week on a topic of his/her choosing. Tutors provide age-appropriate feedback to develop students into poised, effective public speakers.

SCIENCE

The Grammar Level science classes follow the topics covered in the four cycles of the Claritas *Memory Work Guide*, so students receive hands-on experience with the concepts they are memorizing in the New Grammar class.

ART

Each year, students study artists and their works that fall within the cycle's history time period, then complete art projects that mimic the styles used by the artists. Six weeks of art class are devoted to music study. Students learn about the major composers of each era, and listen to several of their compositions.

AFTERNOON ENRICHMENT

Students enjoy listening to a variety of storybooks, read aloud by the tutor, as well as an accompanying craft. The tutor gently guides the students in a Charlotte Mason inspired narration of the stories.
